

II. Tim. 2:15

Worth of Ed. = its creative value

}	Good - Bad boy made good
	Bad - Good boy made bad

Standard for measuring values = Jesus' principles - Dr. John Lord said: "there can be no improvement made in teaching of Jesus and that they shall remain the standard of faith practice"

No creation is to be sought that does not have in it the elements of righteousness - this is why Church entered field of Ed.

Then too State and private schools can't take all the students. more expensive

Teaching in U.S.A.

1. Naturalistic - no personality - no God
2. Vocational tendency - O.K. but the girl canning tomatoes is worth more than the tomatoes.
3. Christian { vocational } combined  
                  { Religious }

Christianity stands for feeding and clothing but for work

☐ we should support our schools

1. They are ours
2. we wanted to do it.
3. Only Colleges where Bible is taught
4. none better
